CCB Action 20070530

Code Versions

Engineering Model (sim/recon): v7r0913p15

New version of calibGenCAL containing the CAL EMI report.

This change only affects the package calibGenCAL, is only used in the standalone CAL EMI report running in the pipeline and has no effect on the reconstruction code (confirmed by the system tests).

There are also two new standalone packages that will run in the pipeline to do the ACD EMI monitoring.

Differences with respect to EngineeringModel v7r0913p14.
