

Linking

Linking to other Confluence pages or external sites is done like so.

```
[Optional Title|URL or Confluence Page]
```

For instance, link to Google like this.

```
[Google Homepage|http://www.google.com]
```

The link will look like this: [Google Homepage](http://www.google.com) .

Link to the Confluence Instructions.

```
[Here is a link to the Confluence Instructions|Confluence Instructions]
```

This will show up like so: [Here is a link to the Confluence Instructions](#)

Alternately, you can leave out the title in either case.

```
[Confluence Instructions]
```

For a link like this: [Confluence Instructions](#) .
