

# June 1

As usual we will meet in the SLAC Ballam room at 10am, and VRVS Orion room.

## Agenda

- Preparing data portal for collaboration meeting
  - Collaboration meeting at end of July
  - Desire for SC2 fully simulated data to be ready for analysis before collaboration meeting
  - Tom plans to have fully simulated data ready by mid-June
    - Background overlays will be handled "similarly" to DC2
  - Need data portal ready by end of June
    - Similar to [DC2 data portal](#), should include
      - Data Catalog – made easy to use for SC2 data
      - Astro Server – adapted to use combined history, made more use friendly
      - WIRED4
      - Skimmer – adapted to use combined history and handle background overlays
      - Combined Astro/Skimmer History
- Skimmer Status
- [Trending interface](#) improvements
  - [frameless](#)
  - tree folder status saved in cookies
  - statistical data is accumulated to avoid out of memory crashes
