June 1, 2005

Host: Ric
Participants: ACD, NRL, Kelly, Jim, Lester, Selim, Jana, Gregg, Hiro, Bryson

- Jira
- Hippo
- Mem Leaks
- Windows vs Linux
- Jim
  2.0 of strip charts ready for deployment

- Selim
  - Online mtg notes in confluence.slac.stanford.edu
    Linked through Online page
  - readSchema updated w/ a new applyConfig
    version allows all old applConfig but w/o register accesses.
    related to OCAL-16
  - Worked on ACD mem leak issue
    Added input to JIRA
    Please send archive file if help is desired w/ QPaint errors.

- Byron
  How are memory leaks debugged? ref count prints?
  - Selim - No, external tools from Jim.

- Jana
  Amedeo pointed out problem w/ moving to Linux
  - Hippodraw doesn't work (!?)
    Canvas issue
    Gregg gets an error msg in EnvMon
  - SVAC-57 issue

- Hiro - Nothing

- Byron
  Shipping 3 CALs Mon.
  Coming to SLAC Mon & Tues
  Retrigger issue (LTE-252)
  Will supply test app to try

- Sharon - Nothing more

- Bryson
  Has working VSC client on Linux
  Has an issue w/ payload usage
  Provided Selim with some distutils code to make installer
  Selim - looks like the way to go
  Uses reqts file but need manual editing.
  Hopefully can get prim. boot command working by today.

- Kelly
  Away next week
  Testing need, call Joe Cullen
  Try to get doc done by Fri if we go on w/ 4.9
