Data Samples

FTP

LCIO Datasets along with corresponding StdHep files and logs, are available via anonymous FTP from SLAC.

Standard Model Samples

Data samples that were generated for the LOI Benchmarking analyses are availabe on the anonymous FTP, to the extent that disk space limitations permit. As these samples are meant to be available for a longer period of time, we have compiled a summary page

Event Requests

If the events you required are not available, we can simulate them for you on the SLAC computing cluster. Please read the Event Requests if you require a customized simulation for your research.
