Request to update DQM alarms limits in L1proc (AlarmsCfg-07-00-35)

Reason for change:

We request to deploy datamonitoring/AlarmsCfg-07-00-35. In this new tag we updated the limits the following DQM quantities:

Lac_Thresholds_FacePos_TH1_TowerCalLayerCalColumn_13_5_10

Lac_Thresholds_FacePos_TH1_TowerCalLayerCalColumn_2_4_3

Test Procedure:

This version of AlarmsCfg has been tested processing locally the monitoring products from different LPA runs (695303900, 695833867).

Rollback procedure:

The package can be rolled back to the previous version by flipping a soft link. Also note that the package is completely independent from any other package running in the pipeline and will not cause a version change of L1Proc.

CCB JIRA:

⚠ SSC-455 - Jira project doesn't exist or you don't have permission to view it.

Details:

Relaxing alarm limits on Lac thresholds for 2 channels:

  - Lac_Thresholds_FacePos_TH1_TowerCalLayerCalColumn_13_5_10:   upper warning limit changed from 2.75 to 2.85
  - Lac_Thresholds_FacePos_TH1_TowerCalLayerCalColumn_2_4_3: upper warning limit changed from 2.75 to 2.85
