

Data Handling Monthly Meetings

Meetings are held monthly via teleconference on first Thursdays, 11:00 Pacific time in the Ballam Conference Room at SLAC. The meetings will also be broadcasted via [EVO](#) system. We do not use video. Please avoid an open mike, which may cause echoes. See the [evo](#) help. For further information be sure to have a look at the [VRVS Etiquette](#) page.

Previous Years

- [2009](#)
- [2008](#)
- [2007](#)
- [2006](#)
- [2005](#)

July 19 2012

- Announcements
 - Please add computing outages to the [List of upcoming outages](#)
- Astroserver and run quality
 - Criteria to load data into the astroserver: how do we handle bad data?
 - [Discrepancies from P120 and P130](#)
- Review [outstanding FDH JIRAs](#)
- Hardware changes (Tom)
 - [Update](#) on NFS disk space upgrade
 - [Update](#) on glastInx server replacement
- Support for DQM
 - Timeout for DQM application
 - Is it possible to have [more meaningful messages](#) from the [log watcher](#)?
 - [Missing log watcher messages](#) from tkrTrendAlarm and verifyComplete
 - Status of the [Bad Time Intervals](#) interface (unified timing convention, etc...).

June 14 2012

- Announcements
 - Please add computing outages to the [List of upcoming outages](#)
 - [New JIRA project](#) for Fermi Data Handling
 - Leap second June 30 -- do we need to do anything?
- Astroserver and run quality
 - Criteria to load data into the astroserver: how do we handle bad data?
 - [Discrepancies from P120 and P130](#)
 - Possible improvements to the [run quality pages](#).
- [Pass8 Dual Tuples](#) (Alex)
- Hardware changes (Tom)
 - [Update](#) on NFS disk space upgrade
 - [Update](#) on glastInx server replacement
- Support for DQM
 - Timeout for reports application
 - Is it possible to have [more meaningful messages](#) from the [log watcher](#)?
 - [Missing log watcher messages](#) from tkrTrendAlarm and verifyComplete
 - Status of automatic shift reminders.
 - Status of the [Bad Time Intervals](#) interface (unified timing convention, etc...).

May 10 2012

- Hardware
 - The plan to replace the sulkys.
 - Existing [NFS server allocation](#)
 - Strawman [proposal for new allocation](#) (version 0)

- Ideas for replacing the glastlnx machines.
 - Summary of [machine characteristics](#)
 - Existing [compute server allocation](#)
 - Whether and how to consolidate?
 - A [snapshot](#) of usage
 - Some [issues](#) to consider
 - How should we organize ourselves for planned computing outages?
- Astroserver and run quality
 - Criteria to load data into the astroserver.
 - Possible improvements to the [run quality pages](#)([pic1](#), [pic2](#)).
- Support for DQM
 - Is it possible to have [more meaningful messages](#) ([pic](#)) from the [log watcher](#) ([pic](#))?
 - [Missing log watcher messages](#) from tkrTrendAlarm and verifyComplete
 - Status of automatic shift reminders.
 - Status of the [Bad Time Intervals](#) ([pic](#)) interface (unified timing convention, fix plot axis, use normalized transient rate plot...).
- Miscellanea
 - Can we improve communication for pipeline work?
 - [New JIRA project](#) for Fermi Data Handling
 - Problems with the data catalog (see [jira](#))
 - Any idea what happened with robots.txt? do we need to password-protect the pipeline web interface?
