

GlastRelease v17r8

[Run Manager Summary](#)

[System Tests v17r8](#)

System Tests Report Summary

GR v17r8 has been deleted in favor of GR v17r9. See [GlastRelease Updates](#)

No differences in comparison of v17r8 and [v17r7](#).

Note that ldf changes are not tested here because the system tests do not currently read real data files. Also, changes affecting Periodic Trigger events are not tested by the current system test simulations.

Changes

- LdfReader, LdfEvent, LdfConverter, digiRootData, enums - handling for TEM bug , update EbfDebug
- Gleam - updates in Ldf2digi
- OverlayRootData, OverlayEvent, Overlay - new stuff for Pt* variables (pointing/FT2 info included in the merit tuple), also recognize non-interaction of simulated event
- astro - update test for SAA polygon
- AnalysisNtuple - fix to ToT averaging, update for ACD counts for PT (periodic trigger) events (JIRA GRINF-52)
