

Remaining issues for P100-MERIT and P100-FT1

Needed changes to P100 Cycle 1 before starting Cycle 2

P100-MERIT

(task to produce new MERIT, FILTEREDMERIT and ELECTRONMERIT)

1. Update runlist with (new) explicit stop time negotiated with L1
2. Exclude 'bad' runs from reprocessing list
3. ★ update of ROOT to solve 'single file skim with TCut' bug
4. skimmer to get back on proper release path and solve misc. problems
5. ★ Fix or kludge tstart/tstop for leap second problem

P100-FT1

(task to produce new FT1, LS1 and ELECTRONFT1)

1. update ScienceTools (v9r15p1 or later) to solve 'dummy.root' problem
2. ★ fix/kludge ScienceTools to solve problem with identifying ROOT I/O problems
3. modify gtmktime bug workaround to prevent temporary file name from being stored in header

★ = solution not yet 'in hand'
