

Running Marlin at SLAC

This page is deprecated.

This page is no longer current and does not reference an up-to-date marlin distribution.

Running Marlin at SLAC

Here is the procedure.

1. SSH to a SLAC Linux machine

```
ssh noric01.slac.stanford.edu
```

2. Setup the MC project software environment

```
source /nfs/slac/g/lcd/mc/prj/bin/prj.sh
```

3. Start the event display

```
ced &
```

4. Run an example

```
cd $PRJ_DIST/MarlinReco/pro/MarlinReco/examples/ldc  
marlin steer_ldc.xml
```

Processors

To dump the list of registered XML processors.

```
marlin -x
```
