PingER NODEDETAILS

Each PingEr node record is associated with a country ID. The user is expected to search for country ID from the list of countries and enter it accordingly in the new pinger node record.

Country Data

The countries listed in the PingER database are accessible from this interface. As with the list of PingER nodes, the records can be searched and sorted. Selecting a particular record shows the details of the country information. The details may be edited. The records may be deleted. Similarly new records may be added.
