Dataflow Lab 1

Unknown macro: 'html'

A short introductory statement...

- (Get some general notes about the TWO labs. For B170, list the available resources: bench, rack, power supply)
- (If you want to use the RCE technology and set up bench and rack space, contact Mike Huffer)
- (Note: have to take SLAC safety courses: General Elx, and Elx Safety for R&D. See the Safety tab for more information.)
