December 2 2005

Today's meeting is in the Kavli room and VRVS Geminga room.

Agenda

- Misc topics
    - Ditchnet Tabs
    - Machine allocation
- Status Reports

h2. Ditchnet Tabs

I added this library to our maven repository. You can include it in your project as:

```
<dependency>
    <groupId>ditchnet</groupId>
    <artifactId>ditchnet-tabs-taglib</artifactId>
    <version>0.8</version>
    <type>jar</type>
    <url>http://ditchnet.org/taglibs/</url>
    <properties>
        <war.bundle>true</war.bundle>
    </properties>
</dependency>
```

Beware of limitations of this library, all pages are rendered at once. Max is thinking about how to improve it to make it more suitable for trending, system tests etc.
