Fahad set up `pinger.uob.edu.pk` as a Pinger monitor host in April 2010. Prior to this we had been monitoring `www.uob.edu.pk` as a remote host. the performance is shown below:

It is seen that though its reachability is not great it is responding most of the time. I am able to get partial data from it for the last few days using [getdata\\_all.pl](#). This is reflected in its [collection status](#).
