

# International Islamic University, Islamabad

Fahad set this up as a monitoring host in April 2010. It is unique in that it requires a userid and password to access. There are two hosts at this site. One is the monitoring hosts vle.iuu.edu.pk, the other is a remote host www.iuu.edu.pk.

As seen in the [collection status](#) the monitoring host has been successfully monitoring and we have gathered data from it for April 20-23, 2010. The host is pingable:

```
51cottrell@pinger:~>ping vle.iuu.edu.pk
PING project.iuu.edu.pk (111.68.97.162) 56(84) bytes of data.
64 bytes from 111.68.97.162.pern.pk (111.68.97.162): icmp_seq=0 ttl=239 time=316 ms
64 bytes from 111.68.97.162.pern.pk (111.68.97.162): icmp_seq=1 ttl=239 time=308 ms
64 bytes from 111.68.97.162.pern.pk (111.68.97.162): icmp_seq=2 ttl=239 time=316 ms

--- project.iuu.edu.pk ping statistics ---
3 packets transmitted, 3 received, 0% packet loss, time 2002ms
rtt min/avg/max/mdev = 308.132/313.622/316.432/3.882 ms, pipe 2
```

Both hosts can be found in [offsite\\_nodes](#) and /afs/slac/package/pinger/nodes.cf

The monitor host does appear in /nfs/slac/g/net/pinger/pingerreports/hep/average\_rtt/average\_rtt-100-by-node.txt.gz so it is being gathered archived and analyzed.

Apr2010 Mar2010 Feb2010 Jan2010 Dec2009 Nov2009 Oct2009 Sep2009 Aug2009 Jul2009 Jun2009 May2009
vle.iuu.edu.pk www.ag31.ga 411.699 . . . . . vle.iuu.edu.pk www.ag31.ga
```

vle.iuu.edu.pk shows up in [pingtable](#) as a monitoring host. Currently (April 24, 2010) according to pingtable vle.iuu.edu.pk is only monitoring two Pakistani hosts, NCP and NIIT (AKA SEECS), both in Islamabad.

However www.iuu.edu.pk is not showing up in [pingtable](#) as a remote host. This may be since Fahad entered its Projecttype as 'r' rather than as 'NOT-SET'. I have fixed this. Maybe it will show up tomorrow.

Also vle.iuu.edu.pk is not showing up as a monitored host from SLAC. I do not understand this.
