No changes appear in the system tests for comparison of GR v17r35p1gr04 and [v17r35p1gr02](#).

Changes

- flux package - fix for occulting astro sources (no sensitivity to this in system tests)

in gr03

- Rootlo - fix for Wired

Notes

The tests being compared were both run for rhel4 opt tag and using fells (Xeon).

Still waiting for the proton job to finish.

System Tests page on glast ground was defunct this morning, but fine after noon.
