

# Getting rid of the "Profile" box on users' home pages.

When viewing users' home pages a "Profile" box sometimes appears and obliterates the content of the page you are trying to view. To get rid of it try clicking on the arrow (with a gray background) on the right of the box.

If this doesn't work it maybe that you are using an old browser. Most confluence features should work wit recent versions of Firefox, Safari and Internet Explorer (7+) or Chrome.
