GlastRelease Tag: rhel4_gcc34opt

System Tests Report Summary

The comparison reference for v17r35p11 is [v17r35p8](#). There are no differences between these releases in the system test distributions. Some scatter might have been expected for recon fitting that uses Minuit. *I note that the system test distributions do not do much or effectively anything with Cal Recon. Might be time to look into that...*

GR v17r35p11 is the candidate for the Pass 7.3 reprocessing.

Changes

- IExternal - move to ROOT v5.26.00a-gl2
