Testing 9/14/2010

Who	Action	Time	Behavior	Comments
Ginger	logged into dev2 from desktop, clicked 'Test Firefox..."	20		KenB says the delay is because of tunneling
Ernest	logged in as iocengr		popup - "Firefox - Restore Previous Session"	KenB says "If someone has a firefox session already opened you will get this window. This is a shared account and other people are using firefox."
Debbie	logged in as iocengr on lcls-srv02	6		
KenB	logged in on OPI	2		Firefox not running
KenB	logged in on OPI	1		Firefox already running
KenB	Firefox already running, launched Confluence	10		
KenB	lcls-dev2$ firefox https://confluence ...	10 for browser, 10 for confluence		
KenB	logged in as iocengr, clicked 'Test Firefox...'	12-15 for browser, 12-15 for confluence		
KenB	logged in as iocengr on lcls-srv02, command line launch	2-3 seconds		
KenB	logged in as iocengr on lcls-srv02, clicked 'Test Firefox...'	10-12 seconds		Need to speed up EDM?

Testing 10/8/2010

Account	Client	Server	Action	Time (in seconds)	Behavior	Comments
physics	OPI	prod	Firefox command line launch	1		
physics	OPI	prod	"Test Firefox" button from EDM	2.8		
kenb	laptop on visitornet	prod	Firefox command line launch	5 - browser window +10 - Confluence load		
kenb	laptop on visitornet	prod	"Test Firefox" button from EDM	25 - browser window +10 - Confluence load		compression = 3

Other Comments

- Adjusting compression in x-win 32 configuration might help speed from public network, depending on client
- When a Firefox windiw is already open, EDM error message "cmd is running"
