

SUNCAT Home Page

This is the internal wiki site of the SUsustainable eNergy through CATalysis (SUNCAT) center, which has a more public web presence [here](#). The center focuses on the development of catalysts that will provide clean energy, as well as energy storage systems. This includes processes like artificial photosynthesis, water-splitting, improved batteries and fuel-cells.

A picture of the group from September, 2010 can be found [here](#). Front row, left to right: Aleksandra Vojvodic, George Tritsarlis, Mónica Garcia-Mota, Venkat Viswanathan, Helle Wellejus, Jens Nørskov, Frank Abild-Pedersen, Felix Studt. Back row, left to right: Chris O'Grady, Poul Georg Moses, Anders Nilsson, Hannes Jónsson, Masoud Aryanpour, Andrew Peterson, Jens Strabo Hummelshøj, Ansgar Schäfer. (Photo by Lori Ann White.)

A cell-phone picture of the first suncat meeting around May 2010 can be found [here](#). Clockwise from left: Felix Studt, Frank Abild-Pedersen, William Durand, Christopher O'Grady, Helle Wellejus, Jens Nørskov, Masoud Aryanpour.
