Andrei Salnikov

Andrei joined SLAC in 2001 as a software developer in BaBar on-line group where he was responsible for development and support of databases used for data taking and processing. Currently Andrei splits his time between two projects: databases and monitoring archive for ATLAS TDAQ system; and data management and data analysis software for LCLS.

Originally from Russia, Andrei started his research career at Budker Institute of Nuclear Physics in Novosibirsk, where he also received his Ph.D. in particle physics.
