

Checkout1 Likelihood analysis

Likelihood analysis for the science tools checkout

The tools in this area are **gtlikelihood**, **gtdiffresp**, **gtexpmap**, **gtlivetimecube**, and **gttsmap**. Most of them are essentially helper applications for **gtlikelihood**.

- Here is a link to the current release version of the [tutorial](#)
- ...and here are the [FT1 and FT2 data files](#) used in the tutorial.
- There is now also a guide to the interactive use of [Likelihood from the Python prompt]<http://www.slac.stanford.edu/exp/glast/ground/software/status/documentation/ScienceTools/latest/Likelihood/latest/pylike.html>]
