InstallingX11MacOSX

Installing X11

First, insert your Mac OS X Install Disc

Step 2

Double-click "Optional Installs.pkg"

Step 3

You'll be greeted with the Installer. Click Continue. Click Continue. Click Continue. Click Agree.

Step 4

Select the disk you'd like to install X11 on and click Continue

Step 5

Select the checkbox next to X11 within the Applications group and click "Install" or "Upgrade".

	Custom Install on "Macintosh	HD"	
•	Package Name	Action	Size
Introduction	▼ ■ Applications		0 bytes 🖌
