[controls-software-b280	http://www.slac.stanford.edu/cgi-bin/lwgate/CONTROLS-SOFTWARE-B280]		add user

Cheetsheet for Mailing List Administration

Before adding an individual to any of the mailing lists obtain a list of the members of that mailing list first, and any of the mailing lists that are subscritbed to within that mailing lists. For example, if a users requests to be added to controls-software-release, issue an email to majordomo with the body of the email that includes

who controls-software-release who controls-software

Scan these lists to see if the users has already been added to one of these lists, or if a typo had been made in an attempt to add this users earlier. In addition, after adding a user to one of the mailing lists, issue a who <mailing list> to majordomo and verify that you have added this user correctly. Check carefully for typos as this is very easy to do. In addition, user MUST be added with the extention slac.stanford.edu. So adding the users luchini would require that the users name be specified in full to majordomo as luchini@slac.stanford.edu.

Adding user to a mailing list		
approve <password> subscribe <mailinglist> <unix username="">@slac.stanford.edu</unix></mailinglist></password>		
Members of a list		
who <mailinglist></mailinglist>		
Removing user froma mailing list		
Members can remove themselves from a mailing list by sending the following message in the body of an email to majordomo@slac.stanford. edu		
unsubscribe <malinglist> <username>@slac.stanford.edu</username></malinglist>		
VMS Distribution Lists		
do not modify, rather modify corresponding majordomo list. Click [here]Controls Group Mailing Lists] to findout corresponding list
