Doug's Page of Potentially Useful but Generally Boring Information

Contents:

Unknown macro: {maketoc}

AFS Stuff: How to do Previously Simple things with AFS Files

- How do I find permissions of AFS files or directories?
- How do I find out who is an an AFS group?
- How can I add users to an AFS group?

MAC Stuff

- How do I Restart AFS on MAC?
    - type **/Library/StartupItems/OpenAFS start**

RTEMS/EPICS Stuff

- How do I show current VME Address Space Mapping?
    - type **BSP_VMEOutboundPortsShow()**
- How do I Mount an NFS Disk from a server?
    - type **nfsMount("uid.gid@134.79.216.11", "/home", "/home")**
    - to get the UID/GID, go the a server prompt and type **id**.
- RTEMS VME Address Mapping on MVME5500 CPU

Port	VME-Addr	Size	PCI-Adrs	Mode:
0:	0x20000000	0x0f000000	0x90000000	A32, Dat, Sup
1:	0x00000000	0x00ff0000	0x9f000000	A24, Dat, Sup
2:	0x00000000	0x00010000	0x9fff0000	A16, Dat, Sup

Mind Mapping Stuff

- Mind Mapping software abounds, but I use MindManager from MindJet Software. "What does one DO with Mind Mapping software?" you might ask. Click here to find out more.
