

LCLS CVS

LCLS Code Management

CVS is used for the for software versioning controls, which can be accessed from the SLAC Unix/Linux farm. For information on the location of the CVS repository and reference directories see Table 1-0.

Documentation

- [CVS Basis](#)
- [CVS Manual\(alt\)](#)
- [ESD CVS Cheetsheet](#)
- [How-to Release Software](#)
- [LCLS How-to Branch a Release](#)
- [How-to Release PLC Software](#)

Table 1-0		
CVS Repository Directory	/afs/slac/g/lcls/cvs	
Build Directory	/afs/slac/g/lcls/build	
Production Directory	/afs/slac/g/lcls/prod	

Table 1.1
CVS Setup
Request that you be given write access to the ACL g-lcls .
Set the following environment variables from the c-shell:
setenv CVSROOT /afs/slac/g/lcls/cvs
setenv CVSIGNORE "O.*"
setenv CVSEDITOR xemacs
