P121 (Pass 7.3) reprocessing

P121 Reprocessing

status: **Test Complete**
last update: 24 Jan 2011

P121 is a very short (~5 run) test of the P120 configuration but with a new detector model. The only changes are these:

1. Use of GlastRelease v17r35p14
2. Addition of these jobOptions

```
GlastDetSvc.xmlfile="$(XMLGEODBSXMLPATH)/flight01/flightSegVols.xml";
CalibDataSvc.CalibFlavorList +={"flight01"};
TkrCalibAlg.internalAlignmentCalibFlavor = "flight01";
```

The new detector model is described here, https://confluence.slac.stanford.edu/display/SCIGRPS/2011/01/17/SIMREQ+for+P7+irfs+with+GR-v17r35p14
