

Dropbox

DropBox (<http://www.dropbox.com/>)

- Quick and easy "just works" way to backup/synchronize files between machines
 - Supports Windows, MacOSX, Linux, iPhone, Android, Blackberry, ...
 - Good integration with Windows File Explorer, Gnome Desktop, Android, etc
 - Smart synchronization on local network
- I use it to store documents I am working on and to transfer pictures etc from phone
 - Even put entire subversion/cvs projects in dropbox folder, it just works!
- Up to 2GB is free (50GB is \$9.99/month)
- Can be used to share files with other dropbox account holders
- No security professionals were consulted in the preparation of this note, use at your own risk.
